

STEPCONE-2025

STANDARD OPERATING PROCEDURE

EVENT NAME: Trade Master

DEPARTMENT NAME : IT ,CSE, CSE(AIML) & CSE(AIDS)

TYPE : Spot Event **EVENT**

DESCRIPTION:

Trade Master is an event where participants will be given currencies to invest on imaginary Stocks that'll be created throughout the session. The participants would be required to analyse conditions of the company and accordingly trade.

Round 1: Portfolio Building

- **Objective:** Teams receive a fixed amount of fake currency to invest in shares of different companies.
- **Task:** Teams must analyze limited data provided about each company and decide where to invest.
- **Surprise Event:** At the end of this round, the first surprise news event is introduced, impacting the value of some companies.
- **Hit Idea:** Teams can purchase "Insider Tips" using a small portion of their fake currency. These tips could give them predictions about which companies will perform well, but they must decide whether the tips are reliable or risky.

Round 2: Dynamic Trading

- **Trading with Other Teams:** Teams will buy and sell shares with each other based on how their stocks are performing after Round 1.
- **New Event:** A new event occurs that affects a specific industry (e.g., new laws for healthcare or tech companies). This changes the value of shares in that sector.
- **Quick Decisions:** Teams need to decide fast whether to:
 - **Buy** more shares if they think the value will go up.
 - **Sell** shares if they think the value will go down.
 - **Hold** onto shares if they think the value will stay the same.
- **Hit Idea:** Introduce "**Market Rumors**" that teams can choose to act on. These rumors might give them an advantage in trading but could also be false information, adding uncertainty to their decisions.

-

Round 3: The Final Showdown

- **Final Values:** The final stock values for all companies are revealed, factoring in the impact of one last surprise global event (e.g., an oil crisis or tech breakthrough).
 - **Task:** Teams calculate their total portfolio value, considering all profits and losses.
 - **Outcome:** Winners and runners-up are determined based on their final financial standings.
- #### **Additional Constraints**

1. **Surprise News Events:**

- Unexpected market events will be introduced during each round.
 - Examples: A sudden interest rate hike affecting all companies, new regulations targeting specific sectors, or a company launching a groundbreaking product.
- Teams must quickly adapt their strategies to handle the impact of these events.

2. **Insider Tips Challenge:**

- Teams can choose to spend a portion of their fake currency to buy "insider tips" about company performance or market trends.
- These tips may not always be accurate, adding an element of risk.
- Teams must decide whether to trust the tips or save their resources for trading.

EVENT GUIDELINES:

- The event lasts **5 hours**, divided into **3 rounds** with trading and strategic decision-making.
 - Teams must have **2 to 3 members** each.
 - **Round 1:** Buy shares with fake currency based on company performance.
 - **Round 2:** Trade shares with other teams, influenced by sector-specific events.
 - **Round 3:** Final share values are revealed, and teams' total amounts are calculated.
 - Winners are determined by the **highest financial standings** at the end of Round 3.
- Team Size:** Team must have minimum size of 2 and maximum of 3 members.

Team Size: 2 to 3

PLAN OF ACTION: - Morning session. (5 hours session)

Judging Criteria:

Winners and runners will be declared based on Participants financial standings at the end

GMR Institute of Technology
