

STEPCONE-2025

STANDARD OPERATING PROCEDURE

EVENT NAME: Exploring the Sky: Fundamentals of Drone Technologies

DEPARTMENT NAME: CSE, CSE(AIML) & CSE(AIDS) ,IT

EVENT TYPE: Workshop

EVENT DESCRIPTION:

Exploring the Sky is an interactive 6-hour workshop focused on the fundamentals of drone technology. Participants will gain insights into the basics of drone components, flight mechanics, and practical applications. This hands-on session includes assembling a drone, understanding flight control systems, and exploring real-world use cases. It's an engaging opportunity for technology enthusiasts to explore the rapidly evolving world of drones.

EVENT GUIDELINES:

Participants must bring their own laptops for programming tasks.

All necessary tools and materials will be provided.

Handle all equipment responsibly to avoid damage.

Respect the session timings and follow trainer instructions.

Workshop Agenda:

Session 1: Introduction to Drone Technology (1 hour)

Session 2: Drone Assembly and Components Overview (2 hours)

Break: 1 hour

Session 3: Flight Mechanics and Programming Basics (2 hours)

Session 4: Practical Demonstration and Q&A (1 hour)

Team Size/No. of Participants: Individual

PLAN OF ACTION: Day Shift

- Welcome and Orientation (20 minutes)
- Provide an overview of the workshop and its objectives.
- Conduct hands-on sessions as per the agenda.
- Allow participants to operate drones in a controlled environment.
- Conclude with Q&A and certificate distribution.

Certification:

Participants who successfully complete the workshop will receive a certificate of participation.
