

STEPCONE-2025

STANDARD OPERATING PROCEDURE

EVENT NAME: Power Path Challenge

DEPARTMENT NAME: EEE

EVENT TYPE: Spot event

EVENT DESCRIPTION:

The goal of the game is to reach the finish line in the shortest time by tackling questions, challenges, and strategic twists. Players begin by rolling a die to determine their potential steps forward. At each space, they face a question. A correct answer allows them to move forward by the die's full value, while an incorrect answer reduces the die number by 1, limiting their advance. Adding complexity, certain spaces on the board feature "discharging elements" that require players to subtract the answer to their previous question from the die number. This subtraction forces them to move backward, introducing strategic setbacks. Players must carefully manage their progress to avoid losing ground. The game also includes timed challenges to keep players on their toes. These tasks must be completed within a set time limit to earn rewards, such as extra steps or immunity from penalties. Success in these challenges can significantly impact a player's progress. Blending knowledge, quick thinking, and careful decision-making, the game tests players' ability to strategize under pressure. The winner is the player who successfully navigates obstacles, answers questions accurately, and reaches the finish line in the shortest time, emerging victorious.

NOTE:

Once you submit your answers or completed tasks in each round, no further changes will be allowed. Make sure you are confident before submitting. Correct answers advance, incorrect answers reduce. Balance answers with task complete.

EVENT GUIDELINES:

- The game starts with a roll of a die to determine the number of steps to take.
- At each step, a question is presented. The player must answer the question correctly to progress.
- If the answer is correct, the die number is added to the current position, and the player moves forward.
- If the answer is incorrect, the die number is reduced by 1.
- Certain spaces on the board feature "discharging elements." If a player lands on one of these spaces, the answer to the previous question is subtracted from the die number, forcing the player to move backward.
- Throughout the game, players may encounter tasks with time limits. Completing these tasks within the allotted time earns rewards and prizes.
- The player who reaches the finish line in the shortest time wins the game.

TEAM RANGE:

We are expecting for 30 teams

And each team contains 2 members

PLAN OF ACTION:

It is dayshift event happens for hours

JUDGING CRITERIA:

- Accuracy in Answering Questions
- Smart Route Planning
- Performance in Timed Challenges
- Creative Problem-Solving
- Speed of Reaching the Finish Line
