STEPCONE-2025

STANDARD OPERATING PROCEDURE

EVENT NAME: Engineering Paradox/Enigma

DEPARTMENT NAME: EEE

EVENT TYPE: Non-Technical Event

EVENT DESCRIPTION:

This event is focused on electrical knowledge-based questions. Each team will be asked 5 to 7 questions, and they must answer all of them. All correct answers should be filled into the empty puzzle within a short duration of time.

ROUND 1: Logical Riddles

- Teams will solve logical engineering riddles and puzzles focused on paradoxes (e.g., Zeno's Paradox, electrical circuit ambiguities).
- Teams receive a set of riddles, and solutions must be presented within a set time limit.
- Qualify based on correct answers and completion time.
- Teams answering the maximum correct riddles in minimal time proceed to the next round.

ROUND 2: Rapid Fire Quiz and Problem-Solving Challenge

- This final round will combine speed and accuracy:
- Part 1: Rapid Fire – Quick responses required for 10 questions.

Part 2: Solve 2-3 numerical or logical problems within 15 minutes.

- Assess accuracy, speed, and clarity in solving basic engineering tasks.
- Teams will be judged based on speed and correctness of their answers.

:

EVENT GUIDELINES:

- Participants are not allowed to touch other team hints, remove or throw other team hints.
- Participants are not allowed to take help of people other than team mates during the event.
- Team may be eliminated/disqualified if they disobey the above rules.

TEAM COMPOSITION:

- Teams of 2 members.
- Teams can be from the same engineering disciplines.

DURATION:

- 4 hours- Day 1 - 10:00 AM to 3:00 PM

FORMAT:

- Teams will be presented with a set of paradoxes or enigmas related to various engineering domains.
- Each puzzle may include a theoretical question.
- Teams must solve all presented challenges within the allocated time frame.

JUDGING CRITERIA:

- Accuracy of the answers.
- Creativity and uniqueness of solutions.
- Time taken to solve each puzzle (in case of ties, time efficiency will be considered).

TEAM SIZE: 2 Members

PLAN OF ACTION: Day-shift
