

Department of Mechanical Engineering

Standard Operating Procedure (SOP)

Empowering Mechanical Engineering with Machine Learning

Event Date: 24-01-2025

Location: CAD LAB

Duration: One day

Objective:

To introduce students to the fundamentals of machine learning (ML) and its applications in mechanical engineering, including hands-on sessions for developing ML models to solve engineering problems.

Roles & Responsibilities:

1.Event Coordinator:

- Oversee all arrangements and ensure smooth event flow.
- Communicate with venue staff and guest speakers.
- Arrange refreshments and ensure adequate supplies.
- Handle on-site issues and participant inquiries.

2.Students Team:

- Set up computers and necessary software.
- Test ML tools and ensure proper installation.
- Provide technical support during the workshop.
- Manage certificate distribution based on attendance.

Procedures:

Pre-Event Preparation:

1.Scheduling & Promotion:

- Announce the workshop date, time, and agenda through online platforms, emails, and notice boards.
- Confirm registration of participants and issue reminders.

2.Venue Arrangement:

- Organize seating and ensure availability of projectors, whiteboards, and internet connectivity.
- Prepare a conducive learning environment with uninterrupted power supply.

3.Technical Setup:

- Install and test required software on all computers.
- Provide sample datasets and code templates for practice.
