Standard Operating Procedure (SOP)

Condition Monitoring Workshop

Event Date: 24-01-2025

Location: CAD LAB

Duration: One day

Objective:

To introduce participants to the fundamentals of condition monitoring, emphasizing its importance in predictive maintenance. The workshop includes theoretical insights aiming to equip participants with the knowledge and tools necessary for effective implementation.

Roles & Responsibilities:

1.Event Coordinator:

- Oversee all arrangements and ensure smooth event execution.
- Communicate with venue staff and guest speakers.
- Coordinate refreshments and supplies.
- Address any on-site issues promptly.

2.Students Team:

- Set up computers and necessary software/tools.
- Test the condition monitoring tools or software prior to the event.
- Provide technical support during the workshop.
- Distribute certificates based on the attendance list.

Procedures:

Pre-Event Preparation:

1.Scheduling & Promotion:

- Announce the workshop date, time, and agenda via online platforms and notice boards.
- Confirm registration of participants.

2. Venue Arrangement:

- Organize seating and ensure availability of projectors, whiteboards, and necessary teaching aids.

3.Technical Setup:

- Install and test required software/tools for condition monitoring.
